

Project Design Phase-I

Date	19 September 2022
Team ID	PNT2022TMID22982
Project Name	Project – Web phishing detection

Solution Architecture

- Solution architecture is a discipline of enterprise architecture that seeks to define and describe the application.
- It is a structural design that addresses a set of functional and non-functional requirements.
- It will bridge the gap between business problems and technology solutions.
- The main goals of a solution architecture are to:
 1. Find the best tech solution to solve existing business problems.
 2. Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
 3. Define features, development phases, and solution requirements.
 4. Provide specifications according to which the solution is defined, managed, and delivered.
